## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a resist transfer pad, classified in class 430, subclass 270.1.
- II. Claims 4-10, drawn to a method of using a photoresist, classified in class 360, subclass 235.2.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in the process of forming steering wheel assemblies for automobiles.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to G. Marlin Knight on 005/09/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
